

Questionnaire intensive care

For advice about the allowance for children with intensive care

Why this questionnaire?

A medical assessment team independently assesses whether children aged 3 to 17 years need intensive care. The team does this based on this form and any information that may be requested from you later. The medical team will advise the RCN unit SZW whether the care your child needs is considered intensive. You will receive a copy of this advice via email. The RCN unit SZW will then decide whether you will receive the allowance.

Filling in this form

Answer the questions as completely as possible. So that we can assess your child's situation better. You can provide an explanation for each question if you wish. If you wish, a support staff member on your island can help you with filling out the questionnaire.

Privacy

There is also an application form with authorization. Complete this form fully and submit it along with this questionnaire. On the application form you can read which information will be shared. Your child's data is handled with care. We adhere to the Wet Bescherming Persoonsgegevens BES, visit
